Head of the master's program in contemporary art, visiting professor

PROFILE

Rose Magee (1990, UK) is a Tallinn-based visual artist with an educational background in archaeological conservation and contemporary art. As the world becomes increasingly divided and polarised her practices recognise objects' inherent agency and power over us. Through installations that allow space to reflect on cultural, personal, and sensory significance she views objects as information carriers that can materialise values and resolve conflicts, revealing deeper truths about ourselves and society.
