Dear Joost,

(written in the morning).

Yesterday was a very special day to me again, working on the materials inspired me very much and I had a lot of fun doing it. Thank you for all your input, I really appreciate this work together and I also would like to say that I'm very grateful for all your patience. I feel there's something very special to find in this work and this process and every day I felt I was gaining more from it.

I like working with the concept of the flowers and I found the cancer galls very inspiring and very much fitting to the concept of transformation that we spoke about before.

I don't have a lot more to add right now except that I'm very much looking forward to dig deeper again today, let's see where this road takes us :)

I would like to add that it really touches me that you're moving to Swiss* and want to give up dancing to become a Monk and teacher. It's very precious and a gift to be able to finally start fulfilling that desire! I hope you can find there everything that you've been looking for.

* Switzerland I meant ;)

All the best,
Joany ♥
