

*Welcome to the Periphery*

**Welcome to the centre**

Heal with Una, Minna and Doggo

*Welcome to the Periphery* is performative and participatory installation based on qualities of softness, kindness, childlikeness, slowness and effortlessness as a working methods. It is a process of two artists who where talking about the otherness inside the community, being tired and feeling outsider.

The purpose was to create an imagined community, utopia that centralizes the periphery and enables the multi centricity, diversity and polyphony. When the public space and especially studying space is mostly built on the assumption of mediocrity, being healthy, energetic, dynamic, ambitious, hard-working and consuming individual, *Welcome to the Periphery* offers the safe space, soft corner, place for rest and feeling of belonging to.
