Capturing Intention

Interactive Installation Double Skin/Double Mind

General information

- . The installation is a box created by the Zero truss system, with a see-through projection by a video beam and four speakers. The outside measurements of the box are: 4 X 4 X 3 meters.
- . The necessary space to make the installation possible is a minimum of: **Height: 4,5 mtr, Depth: 11 mtr, Width: 9 mtr**
- . The space in which the installation will be shown must be a black or white space as clean as possible.
- . It is essential that the space can be completely dark, with no windows and no spill from exit signs.
- . Only one person can experience the installation, which lasts around 18 min.
- . The installation works with the software Gesture Follower developed by Frederic Bevilacqua at IRCAM and it is run by an operator and needs of a minimum of two technicians to build up.

Equipment etc. provided by the museum/ theatre/festival

- . Beamer (minimum 7000 lumen, seize of the lens needs to be discussed depending on seize of the hall)
- . enough cable to connect the beamer to an apple computer
- . 2 Loud speakers plus cable to be connected to our Apple computer
- . black marly dance floor for the whole space or a minimum of 9 by 9 meters
- . two technicians to assist in rigging and break down.

Material provided by the company

- . truss construction made of Zero-truss
- . 1 X see-through projection screen
- . 2 X black gauze curtain for installation
- . 4 loudspeakers / wireless sound interface
- . 1 X apple laptop computer
- . 1 X infra red camera
- . 4 X IR lamps 75W
- . 1 audio-4 channel output / wireless sound interface
- . 1 person to build and operate the installation and 1 operator.
