concept A

PC: 2ch Stereo audio with standard commercial playback app OR Smartphone OR solid state player (classic iPod or similar)

Active Loudspeakers

Audio Mixer:
2 into 6 channels
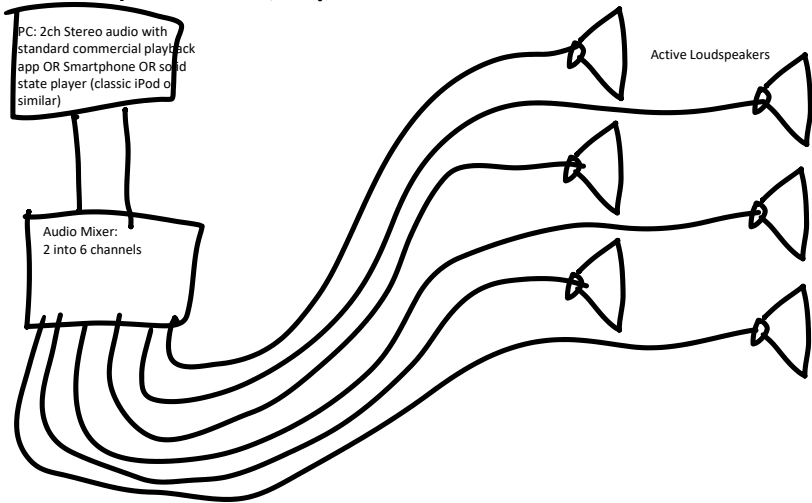

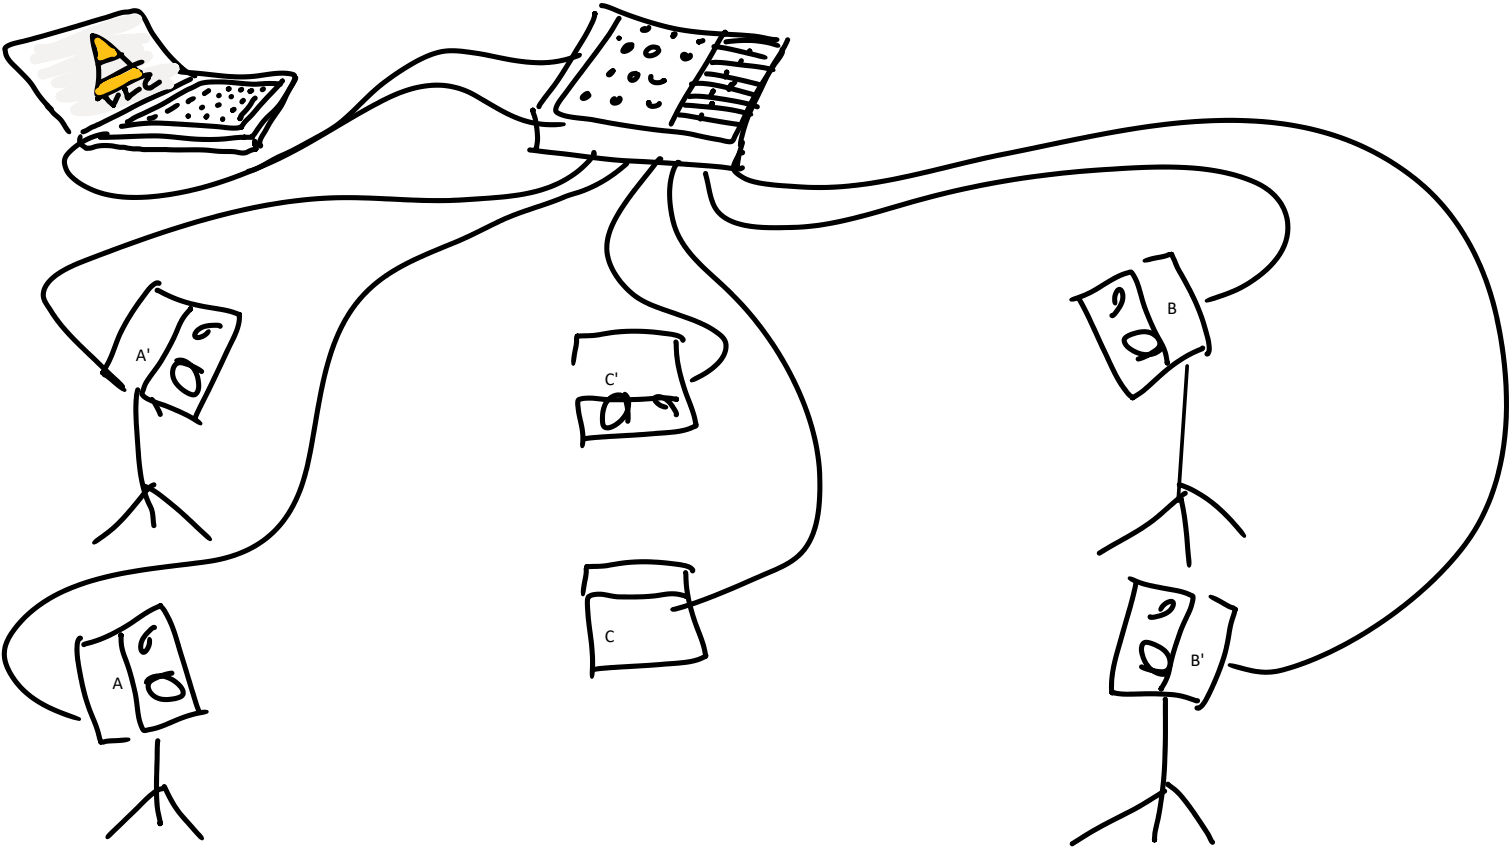

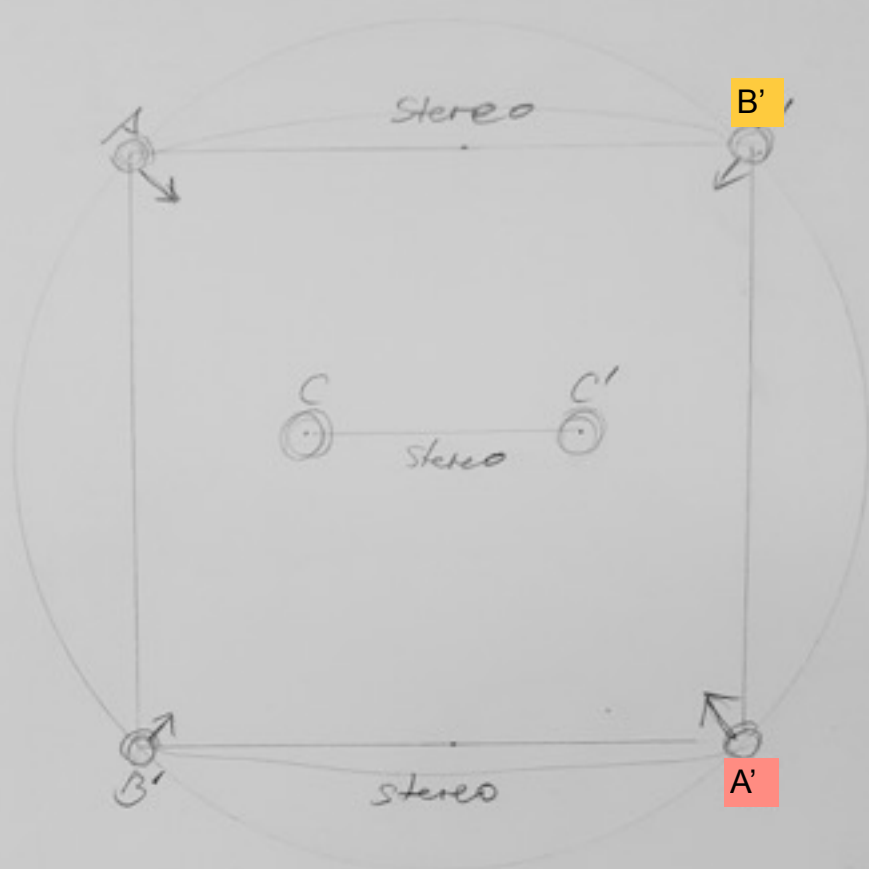

- The Playback Device ist pictured as a laptop running VLC
- The Mixer is pictured as an analog mixing desk but it yould also be a piece of audio hardware like an RME Fireface UC using the internal mixer and distributing via discrete analog outputs
- Distribution Matrix for the 2ch (Stereo) Input Signal is (this is what the mixer does):

CH1 ->	A	B	C
CH2 ->	A'	B'	C'

Sound composition B.O.D.Y. - Piece of Glass
2012/2024 is a generative, but an assemblage
