

Catalina Vallejos

Time-Based Artist

+818010983559 / +19723021886

itskiny@gmail.com

My work pertains to the world as a borderless reality, and of Earth as a living being that is hosting us humans with kindness and love.

With this in mind, I develop my practice by mainly working with DIY principles that manifest using a Zero Waste mentality for a Sustainable Reality, where we first concern ourselves with our well-being in relation to the environments we inhabit.

My mediums vary, but the resulting manifestation is usually in the form of a Time-Based Performance Installation that was researched and constructed by exploring my shape-seeking philosophy using Painting, Sculpture, Ornament, Sound Instruments, Collage, Video Editing, Precarios, Writing, Programming, Digital Media, Recycling, Upcycling, and the crafting of a reality by evidence of Conscious Consumerism and Zero Waste Fashion.

My language skill set includes native-level English, French, and Spanish, and I can read and communicate via email in Japanese, German, Italian, and Portuguese.

My computer skill set includes Adobe CC and its Open Source analogues, Microsoft Office and its Google analogues, Linux, Unity 3D, Audacity, Final Cut Pro and a keen sense for figuring out new software, and emerging creative coding tools for Glitch and other Visual and Sound Art methods.

My physical skill set includes woodworking for traditional Oil Painting and Japanese Painting, Oil Painting, Japanese Wood Carving, Japanese Sippo Enamel for jewellery making, Installation Art, Sculpture, Apparel and Jewellery Design and Construction for Costume and Fashion, Hardware Hacking for Sound Experimentation, Etching, Silkscreening and other manual Printmaking techniques.

Education
