Certificate of Authenticity
Meteorite: MWA XXX
Location: Northwest Africa
Find/Fall: 2015 (prob.)
Type: 460 (1.2 pieces)
Weight: 460g
Provenance: Lahcen Ali-Ha
Meteorite Collection
Kelly Wombacher

CAMPO DEL CIELO
Gran Chaco, Guallamba, Argentina
Found 1976
Iron, Octahedrite, coarse (AB-MG)
Total known weight >50,000 kg

SIKHOTE-ALIN
Mediterranean, Russia
Fall Oct 7, February 12, 1935
Iron, Chondritic, coarse
Total known weight >10,000 kg

Gan Gan
Iron, IVA
Chaco, Argentina
Found 1984
Mass - 83 kg

Different Asteroid & Meteorite Types
The diagram illustrates the relationship between different types of asteroids and the meteorites they produce. It shows that S-type asteroids produce S-type meteorites, C-type produce C-type, and M-type produce M-type. The diagram also indicates that some meteorites, like iron meteorites, are not associated with a specific asteroid type.

The origin of Meteorites
Main asteroid belt
