SECRET

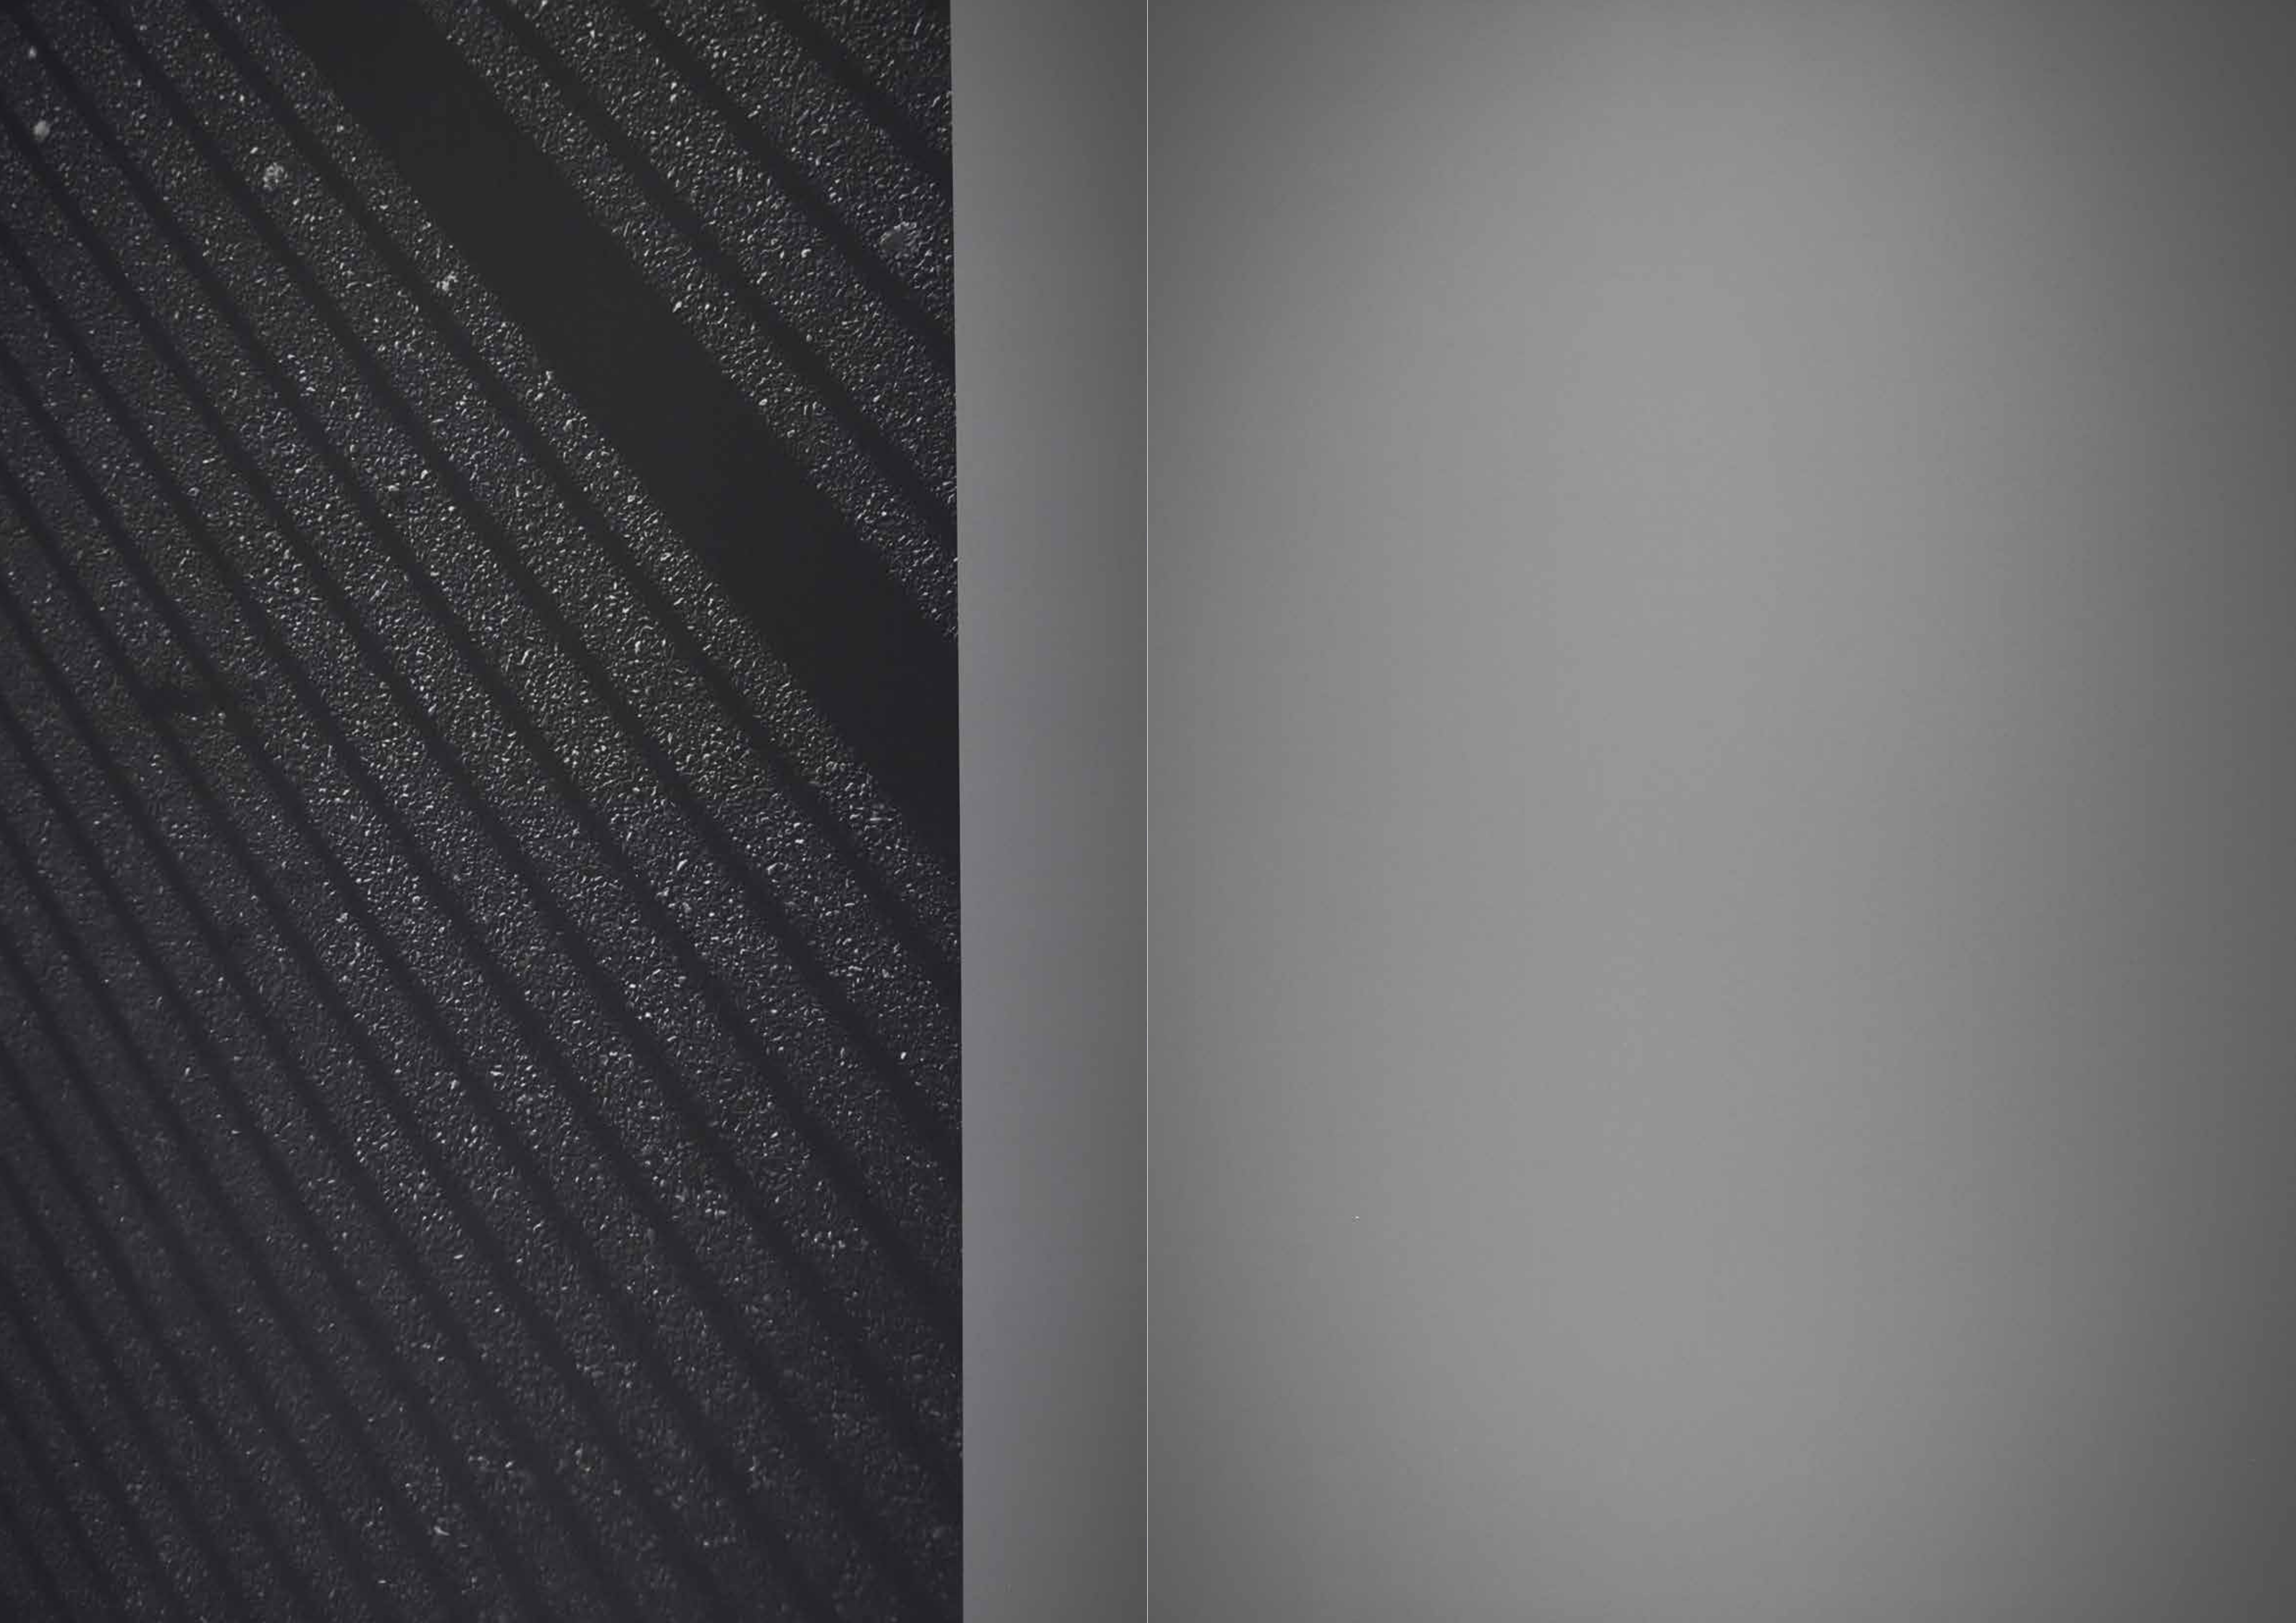

A black and white photograph of a long, thin, and highly textured object, possibly a piece of driftwood or a fossilized bone. The object is oriented diagonally from the bottom left towards the top right. It has a complex, irregular shape with many small protrusions, indentations, and a rough, weathered surface. The lighting highlights the texture and the elongated form of the object.

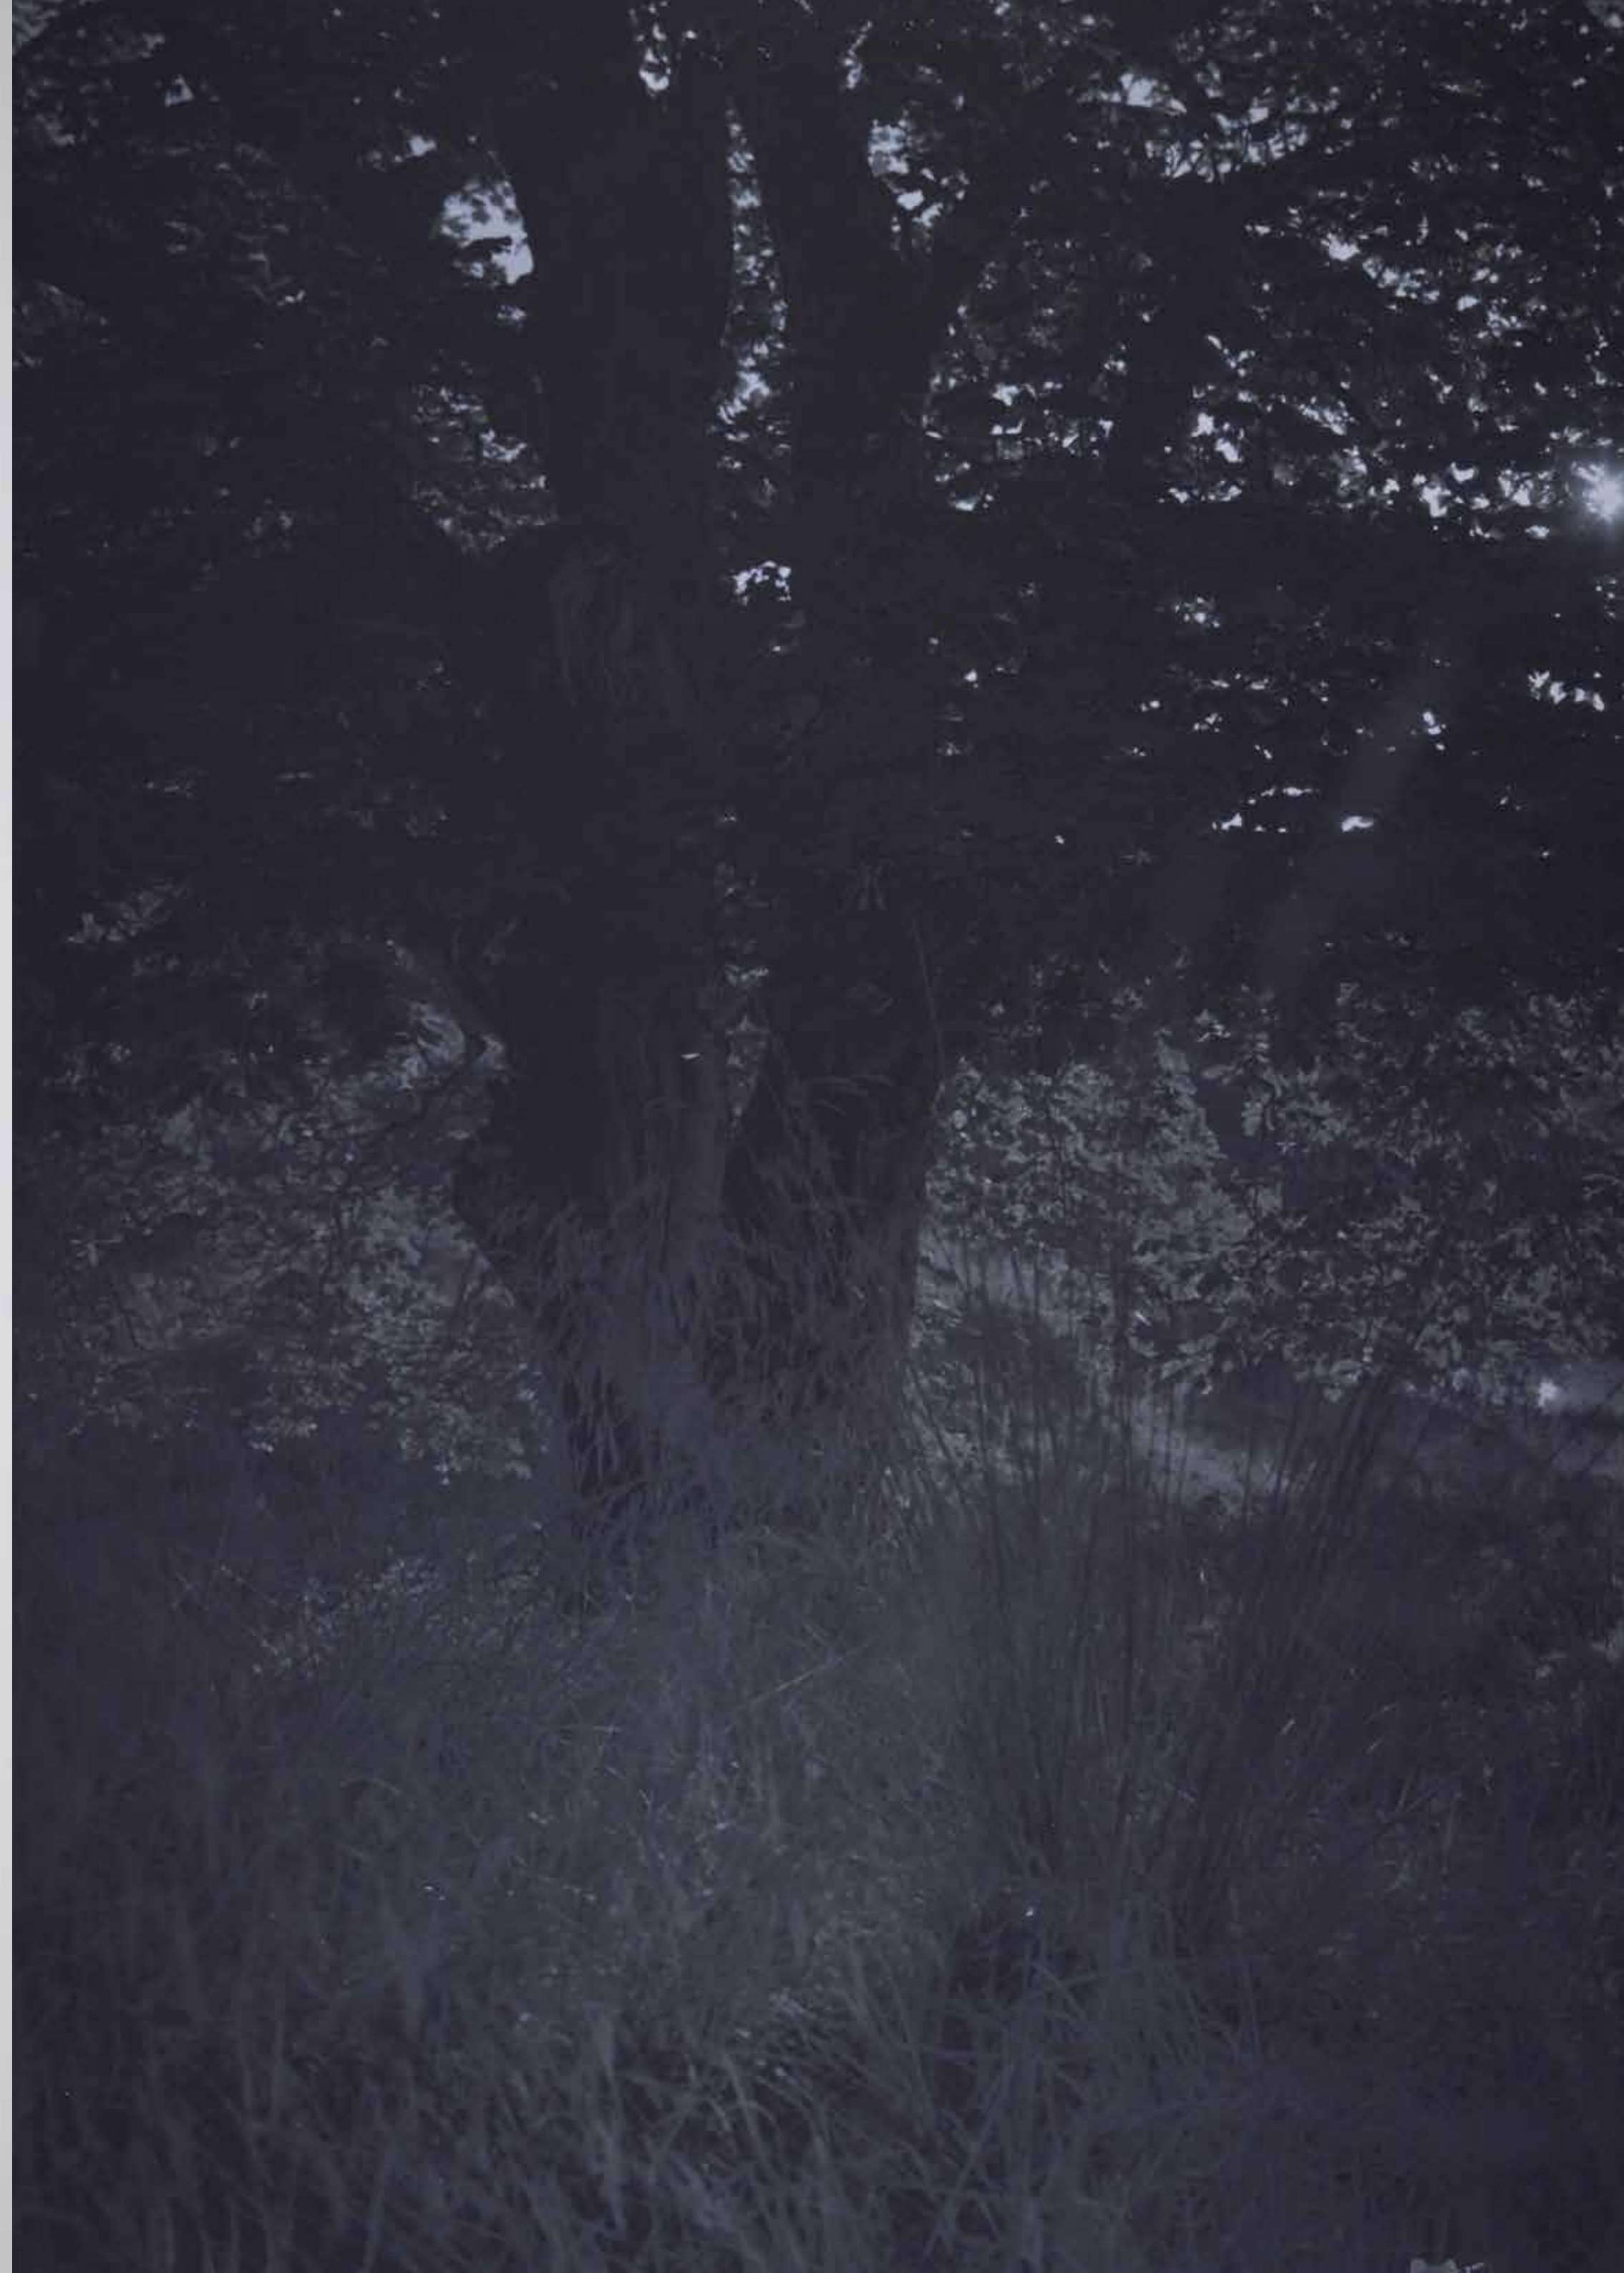

Peonies from the pens near the entrance

The lens was
as difficult to judge under these conditions

and the photographing
