

# Curriculum Vitae for Tina Auer

**current at Jun 2019**

Tina Auers' work oscillates almost carelessly between art, research, technology, entertainment and science. She has been part of Time's Up since it was founded in 1996. Together with the collective Time's Up, she works on the creation, conception, implementation and evaluation of media-enhanced, interactively challenging, physically substantial architectures. These she understands as self-contained worlds that allude to scenarios of everyday life and possible future settings, that provide visitors/users and herself with a playful and fascinating approach to the mixed realities they proffer, that fan the flames of the spirit of discovery, and make the act of exploring these worlds and the narratives that animate them an all-encompassing experience. She has toured Europe, Asia, Africa and Australia with works such as Turnton Docklands, Mind The Map, Unattended Luggage, Tales of Resilience, BodySPIN, the Hyperfitness Studio and Sensory Circus. Linz has been her base station (i.e. workshop & lab complex) since 1992.
