## RESEARCHER / LECTURER / ARTIST

**I am a researcher, fashion designer, and artist, whose work merges the field of non-visual aesthetics, sonic identity, design archives, and inclusion.** Starting with costume performances and individual fashion collections, later I expanded my practices into interactive sculpture, sound, and installation art. My current Ph.D. research is investigating the dressed body as a temporal form. Prior to Ph.D. studies, I was investigating acoustically oriented design methods within the artistic-social projects for inclusion (e.g. Anti-ideal, Beyond Seeing) aiming to build the foundations for non-visual aesthetics and open up space for sound-based thinking.
