Evaluate each parameter from 1 to 5 and explain why:

1. Logistics 4 - Room booking (thank u)

2. Content of the collaboration 4 → I think we're doing something interesting, you are super creative and always bring new ideas, that's great!
Perhaps I should bring more from my side? (Initial idea was collaborative composition, but you're clearly more used to that)
↳ What do you think?

3. Atmosphere/mood in the collaboration 5 I really enjoy our sessions

4. Work outside the sessions (enjoyment in devoting time to this project)

3 I have been a bit overwhelmed lately with external deadlines, so I have not produced the documentation nor practiced a lot, I hope to find energy for this in the coming weeks! As said before, I'd also like to propose more musical material, but not sure on how...

5. Time / mental space (weight of the amount of time requested)

4 I think a lot about it, I could do a bit more. Really a busy period.

How is this project being compared to your expectations? Interesting to see how the collaboration actually takes shape!

- One thing you really like about this project: That you are always very creative & full of ideas
- One thing you would change about this project: I'd like to bring more musical ideas
- Check offers and expectation (see session 1) ✓

Evaluate each parameter from 1 to 5 and explain why:

1. Logistics

4-5 never really anything to complain, brings stuff etc. look around.
20 years

2. Content of the collaboration

4 maybe we could go a bit more in depth on stuff you already know instead of only my sketch.

3. Atmosphere/mood in the collaboration

4 i guess don't be afraid of doing stuff you haven't practiced and maybe more open to trying out things which are still ideas

4. Work outside the sessions (enjoyment in devoting time to this project)

5 i enjoy it at the amount of time

5. Time / mental space (weight of the amount of time requested)

5, it's the thing is like doing, not being administrative stuff

How is this project being compared to your expectations?

similar, still in early stage of course, maybe more or collaborative competition but like is said still early

- One thing you really like about this project: we can just try out a lot
- One thing you would change about this project: maybe more "lecture" stuff
- Check offers and expectation (see session 1)

no forceful thing that
