

expand and contract

more		
	extreme weathers	
more	rainfall	
more	snow	
more	meltwater	
more	infiltration	
		by water
more	heat	
more	drought	

leading to rock material expanding and contracting in a higher frequency	causing the acceleration of an unstable mass breaking apart soon
---	---

move very slowly
let your body expand
let your body contract
the order is free choice
what in this space makes you expand?
what in this space makes you contract?
expand with your whole body
contract with your whole body
expand with one or more parts of your body
contract with one or more parts of your body
