

Mondrisonic - Instrumental Improvisers Score

| | |
|--|---|
| <p>Section1 – full pallet</p> <p>Brain performer: Increase boxes</p> <p>Sound: High drones mixed with the sounds of children.</p> <p>Added boxes will increase the dominance of a particular colour which will be reflected in the audio mix</p> |  |
| <p>Section2 - red</p> <p>Brain performer: Increase speed</p> <p>Sound: The pallet includes more distorted sound with low/mid drone and more artefacts such as crackles and noise. The rate of change in the dimensions of the boxes will be reflected in the rate of change in the mix</p> |  |
| <p>Section 3 - blue</p> <p>Brain performer: Increase gap and slow down</p> <p>Sound: The pallet feels more organix including white noise and sounds of nature such as the sea. The change in the gaps between the boxes will not change the overall mix, concentrate on the colour balance as an indication of the mix state.</p> |  |
| <p>Section 4 - yellow</p> <p>Brain performer: Increase boxes</p> <p>Sound: The pallet is eerie and uncanny containing a strange mix or metallic sounds, creaking doors etc. Added boxes will increase the dominance of a particular colour, which will be reflected in the audio mix in the same manner as section 1</p> |  |
| <p>Section 5 – full pallet</p> <p>Brain performer: Less movement, decrease boxes</p> <p>Sound: This is a return to the sound pallet of section 1(high drones, sounds of children) as the boxes decrease the pallet of sounds will be come more spare, possible arriving at only two boxes.</p> |  |
