CREATOR STATEMENT

Aug 2022:

"My sister, converted into shamanism, opened the doors to a world in which alternative medicine is an ancestral cure for native Indigenous. The experience itself, when done with tribes is a beautiful experience for some, and a nightmare -for others.

The project is for those who out of curiosity, want to experience an ancestral ceremony from Northamerican natives, in a safe way".

April 2023:

"To explain scientific laws, such as quantum mechanics, is to go back to what native indigenous believe in for generations: that we are connected (entanglement), that we get for what we ask for (attraction), and that we are able to be in different places at the same time (tunneling).

Its a form or art to realize everything is about connections; a collective consciousness that heal our spirits and we long forget in urban areas".
