

## **Dry Pastel Recipe**

### **Makings:**

- Pigment
- Gelatin
- Gum Arabic powder
- Soap (moisturizer)

### **Preparation:**

- Gum Arabic should be prepared in advance (preferably one day in advance) with the following formula → : 3 tablespoons of gum Arabic powder to 1 liter of warm water. (Warm water help in the process of dissolving the powder).
- Soap should be chosen for its moisturizing quality. Soap that contains a large amount of glycerin should be avoided, as it will not help in the process of making the pastries.
- For the gelatin solution: → 6 gelatin sheets to 600ml of cold water. Let it hydrate for 15 minutes and then place in a double boiler until melted.
- After all the previous steps are ready, add two tablespoons of gelatin solution, 1 gum Arabic and 1 soap solution to the pigment powder. Add gelatin as needed, until the dough is homogeneous and ready to roll into a pastry shape.
